'HALAAL' PORK- A GLOBAL SATANIC ISSUE

The proliferation of the 'halaal' certification racket has led to Muslims consuming 'halaal' pork, not only in South Africa. In all countries where the devilish trade of halaal certification has been established, pork, donkey meat, dog meat and all types of carrion meat have been and are being fraudulently and intentionally labelled 'halaal'. Muslims all over the world are consuming halaalized pork – halaalized by the agents of Shaitaan – the haraam 'halaal' certificate bodies who have sold their Imaan for the miserable rands and dollars of this worldly life.

It has now been discovered that Muslim children in schools in England have been fed 'halaal' pork. Even the non-Muslim City Council of Westminster City is appalled over the commission of this halaalized pork fraud. Thus the Westminster City Council has instructed the contractor supplying the pork carrion to stop supplying meat and to no longer use its "halaal meat supplier". Whilst the contractor supplying the meat has been temporarily stopped, the so-called Muslim 'halaal' meat supplier has been given the boot for the fraud of feeding Muslims swine-flesh.

The following is the press report on this PORK SCANDAL which is bedeviling Muslims in South Africa as well as in all western countries where 'halaal' certification organizations halaalize meat.

Pork found in halaal meat in school

2013-03-14 21:34

London - Traces of pork were found in halaal chicken sausages served in at least one primary school in central London, the local city council said on Thursday. The pork was detected at St Mary's Bryanston Square Primary School after Westminster City Council conducted tests of meat products in schools in the wake of a horse meat mislabelling scandal across Europe.

"In the issue obviously where halaal is concerned pork is pork," a spokesperson for Westminster City Council said. "So we're not going to split hairs over quantities." Council officers took seven samples from three schools in the week beginning on 25 February to test them for the presence of DNA from beef, lamb, pork, chicken, turkey, goat and horse.

The Council said it had a contract with Chartwells, which is part of catering company Compass Group, to provide meals for around 40 schools in Westminster. No horsemeat has been found in any of the samples, the spokesperson said. Chartwells and Compass were not immediately available for comment.

The council said it had instructed its contractor to temporarily stop supplying meat until the issue is resolved, and to no longer use its halaal meat supplier. - Reuters (NEWS24)

ALL MEAT HALAALIZED BY THE HARAAM 'HALAAL' CERTIFICATE BODIES IN WESTERN COUNTRIES IS HARAAM AND CONSISTS OF CARRION OF A VARIETY OF

KINDS OF MEAT, INCLUDING PORK.
