

THE FILTH, DISEASE AND BRUTALITY OF THE HALAALIZED CARRION CHICKENS YOU DEVOUR

“CHICKEN FARM SHOCKS SPCA

When SPCA inspectors carried out a proactive visit to the Eden Rock Poultry Farm in Assagay, they were horrified at what they found, they said on Tuesday.

“The build-up of chicken faeces on the floor was deplorable. Inspectors had to walk through the faeces in their gumboots as they searched for injured and sick birds in the cages,” said a statement from the Kloof and Highway SPCA, which is preparing to lay a charge of animal cruelty against the farm, which has four chicken houses, each containing 11 500 birds...

The shocked inspectors found 38 birds buried in the faeces on the floor, unable to access food and water, “and literally drowning in faeces or starving to death”.

A hundred dead birds were among the live birds and as many of the carcasses had been left “for an extended period”, the smell of rotting flesh was overpowering, the SPCA said.

“The State Veterinary Services, as well as the Health Department was called in to do an assessment of the facility. Concerns were raised about the hygiene and cleanliness of the farm, which can lead to the spread of diseases between animals and people.”

Cheri Cooke, manager of the Inspectorate Department, said that what she found “disgraceful” was that the staff continued to collect eggs, walking past dead and dying chickens ensuring that the farmer continued to make his profit, while the animals suffered.

The SPCA said that the conditions at the farm fell far below the minimum standards of the South African Poultry Association's codes of practice...

Cooke said that when the SPCA came across any animal that was suffering, it had to be humanely put down. The 21 chickens in question were mainly starving to death, she said.

"If the farmer was abiding by the SA Poultry Association code of conduct, the chickens would be checked twice a day and we would not have seen the cruelty that we did," she said.

"Dead chickens were rotting and in the same cages with live chickens, and yet the staff still managed to walk up and down and pick up eggs," she said...

Cooke said the SPCA was working with the police to put the docket together."

=====

What has been reported above is the appallingly rotten state of the broiler chicken industry. There is no surprise in the rising incidence of cancer, diabetes, heart diseases, etc. which the experts attribute to the diseased, artificial chickens which people devour. Even the eggs of these diseased, brutalized chickens are poisoned, diseased and destructive both physically and spiritually.

These us the diseased rot (*RIJS*) which haraam entities such as MJC, SANHA, ICSA and NIHT halaalize. This horrible 'halaalized' muck which perhaps even Iblis and his legion will not devour is devoured by Muslims who are commanded by the Qur'aan:

"O People! Eat from the earth that which is halaal (lawful) and ṭayyib (wholesome), and do not follow in the footsteps of shaitaan."

***Verily, he (the devil) is your open (declared) enemy
Verily, he instructs you with only evil and immorality, and that
you fabricate about Allah what you know not.”
(Qur’aan)***

The satanic ‘halaalizing’ entities are most assuredly the agents of Iblis. They fabricate in the Name of Allah that the rotten, diseased, stinking, haraam carrion chickens are ‘halaal’. This is the lesson of fabrication in Allah’s Name which shaitaan whispers to them. It is not difficult to understand the massive fraud, pillage and plunder of Imaan and ruin of Akhlaaq perpetrated by the legion of Iblis. You only have to follow Rasulullah’s command:

“Seek a fatwa from your heart.”

Provided that your heart has not been deranged and provided your Imaani conscience has not yet been extinguished by the deluge of carrion chickens and other haraam processed junk food, your heart will invariably respond:

“Assuredly, all carrion chickens halaalized by Shaitaan’s halaalizing agents are HARAAM and Diseased.”
