THE BRUTAL REPRESSIVE SAUDI REGIME

SAUDI PRINCE DEFECTS – ABANDONS THE KUFR SAUDI REGIME

The following report is another exposure of the villainy of the evil Saudi regime which pretends to be an 'islamic' government whilst in reality undermining Islam by being the bedfellow of America and Israel, and ruling the land as a surrogate of the U.S. kuffaar:

Prince Khalid Bin Farhan Al-Saud has announced his defection from Al Saud royal family through a statement, calling on other princes to break their silence and reveal the truth for sake of God.

In his statement on Saturday, the Saudi prince referred to his 'sufferings' under reign of Al Saud regime describing them as bitter experiences that will be revealed by the Saudi twitter writer Mujtahid and Saudi activist Saad al-Faqih, who is currently living in London.

He said he thanked God that helped him understand the truth about Saudi regime through a "direct horrible personal experience" so that he could have a taste of what people suffered from throughout the country.

With pride, I announce my defection from Al Saudi family in Saudi Arabia, he wrote in his statement.

"This regime in Saudi Arabia does not stand by God's rules or even (country's) established rules and its policies, decisions, and actions are totally based on personal will of its leaders." "All that is said in Saudi Arabia about respecting law and religion rules are factitious so that they can lie and pretend that the regime obeys Islamic rules."

He criticized the royal family for considering the country as its own property while silencing all voices from inside and outside the government calling for any change and reforms.

Khalid Bin Farhan said the ruling family has deliberately pulled the country to the current condition where cries of oppressed people are ignored.

"They don't think about anything but their personal benefits and do not care for country's and people's interests or even national security," he added.

He warned that current problems of the Saudi Arabia are not "temporary or superficial" and they do not end at unemployment, low wages and unjustified distribution of common wealth, facilities and services.

"The problems are deep and real," he said adding that they are concerned with political and financial corruption and abuse of power by the regime and fraud in the parliament and judiciary system.

The Saudi prince said everything that the pro-reform opposition says about country's political, economical, judiciary, social and security condition as well as their abuse of religious values are true and "the situation is even worse than what is said in criticisms"

He called on all those who cared for the future of the country to join him and the reform stream and break their silence on Al Saud corruptions.
