

LISTERIOSIS OUTBREAK

Written by Administrator - Last Updated Tuesday, 06 March 2018 11:11

CAUSED BY RAINBOW AND ENTERPRISE HARAAM CARRION PRODUCTS

THIS IS THE HARAAM DISEASED CARRION – SHAITAAN’S FOOD - YOU DEVOUR

THE HERALD, 5 March, 2018 REPORTED:

“ONE factory has been blamed as the source of the world’s largest outbreak of listeriosis – the Enterprise polony factory in Polokwane, Limpopo.

Listeriosis, which causes flu-like symptoms, nausea, diarrhoea and infection of the blood stream and brain, has led to 180 deaths and 948 reported cases since January last year.

“We can now conclude scientifically that the source of the present outbreak is the Enterprise Foods production facility located in Polokwane,” Health Minister Aaron Motsoaledi told a briefing at the offices of the National Institute of Communicable Diseases (NICD) in Johannesburg yesterday.

Environmental health practitioners, members of the Department of Health and World Health Organisation (WHO) technical advisers visited the factory and took samples.

LISTERIOSIS OUTBREAK

Written by Administrator - Last Updated Tuesday, 06 March 2018 11:11

Sixteen samples tested positive for the listeria monocytogenes strain ST6 that caused the outbreak.

The DNA results of the bacteria were confirmed late on Saturday night by the NICD.

“The environmental swabs indicated massive listeria contamination,” WHO South Africa representative RufaroChatora said. Enterprise is a unit of Tiger Brands. Samples from two other factories have tested positive for the listeria bacteria.”

Rainbow Chicken killing facility halaalized by SANHA and the MJC carrion cartel, has also substantially contributed to the disease outbreak. About Rainbow’s contribution to the disease, *The Herald reports:*

“The Rainbow Chicken factory in Wolweburg in Sasolburg also had listeria, but it is not the same strain as that linked to the outbreak.

Its polony products have been recalled by the National Consumer Commission.

It can take five days of testing to identify the DNA strain.

The two companies were notified yesterday morning that their factories were to blame and products from those factories had to be recalled.

LISTERIOSIS OUTBREAK

Written by Administrator - Last Updated Tuesday, 06 March 2018 11:11

The companies have to stop production and have lost their export licences for now.

“We are urgently withdrawing them from our stores,” Pick n Pay group executive, strategy and corporate affairs, David North said. “All Enterprise products – including the Bokkie, Renown, Lifestyle and Mieliekip brands – have already been recalled by the company concerned and we are urgently withdrawing them from our stores.

“In addition, all ready-to-eat products such as polony and Russian sausages manufactured at the Rainbow facility in Sasolburg are also being withdrawn. As a precaution, Pick n Pay-branded chicken polony, manufactured by Rainbow, is also being withdrawn.

Trade and Industry Department director-general Lionel October said there must have been a drop in the standards of food testing by these companies.

Motsoaledi said it was problematic that health inspectors were employed by municipalities. These are the people who do random health and safety testing of food production facilities. (End of report)

The avalanche of haraam carrion chicken and carrion meat products halaalized by SANHA, MJC, NIHT and the rest of the Carrion-Halaalizing Mafia thugs, is the primary cause for the massive increase of serious diseases such as diabetes, cancer, etc. in the Muslim community. Some decades ago before the advent of these human shayaateen who halaalize carrion, the Muslims were comparatively speaking a disease-free community. But, today they are reeling with diseases such as cancer and diabetes. Hitherto unknown and undiagnosable diseases are afflicting the Muslim community. This is Allah’s *Athaab* for devouring shaitaan’s food in Allah’s Name.

Consumption and halaalization of carrion have so desensitized these Agents of Ibees that they fail to understand the villainy and shaitaaniyat of issuing ‘halaal’ certificates to kuffaar meat and chicken establishments. The danger of eliminating Muslim inhibition to consuming meat and chicken products acquired from the kuffaar does not remotely occur to these auliya of shaitaan. It makes us wonder if they are perhaps atheists. People who have true Imaan have some fear for the Accountability in the Divine Court on

the Day of Qiyaamah. But these scoundrels who halaalize shaitaan's carrion 'foods' are concerned with only the haraam boodle they extract from the business people for doling out stupid haraam 'halaal' certificates.

Muslims should have mercy on their own bodies and souls which they are destroying with their carrion addiction. On the Day of Qiyaamah we shall be questioned about the amanat (trust) of the physical health Allah Ta'ala has bestowed to us. Haraam food – halaalized carrion – shaitaan's food is the primary cause for destruction of physical health and for total annihilation of our spiritual well-being. Imaan becomes like a withered, collapsing reed by the ingestion of the haraam halaalized carrion which the Agents of Iblees fraudulently pass off as 'halaal'. This they do for the love of the boodle about which Rasulullah (Sallallahu alayhi wasallam) said:

"The love of the dunya is the root of every evil"

Both spiritual and physical evils come within the purview of this Hadith and many other Ahaadith.
