VACCINE DAMAGE

Words of Caution

Good day. I am Nazier Allie from Cape Town. I greet you today with a very heavy heart. I'm not one for posting on social media and the likes, but I feel it is my duty as a human being to inform and warn others of our current personal life experience. Today I was saddled with the task of taking my father in law to the doctor with the hope that he could do something to repair the damage that the second jab caused my father in law. He was a very enthusiastic, healthy, active, busy, energetic ex-Springbok rugby player at the age of 78. Very Very much lively until Friday 30th July 2021. Immediately after taking the second jab he could not walk. Him and his wife went there in a very happy mood and proud to be taking their second Pfizer jab., little did they know that he would return practically a vegetable. He sits in one place, totally oblivious to what's happening around him. Myself and my brother in law had to carry him wherever he needed to go. He doesn't respond even if you try to engage him with his most favorite topics. He cant eat nor drink by himself. It really hurts to see him like this. This is a reality. I beg of each and every single one of you who gets to read this message to please stay as far away from the Covid "vaccination" as possible. If you find the slightest doubt in what I have written here, please feel free to contact me, as I have nothing to hide, the damage is done, it's irreversible. Even the people who administered the "vaccine" cannot assist or do anything for him. We've lost a healthy strong enthusiastic father not to Covid, but to a stupid "Vaccine". My number is 0795130397. Please feel free to spread this message as widely as possible, maybe we can save at least one life.
