

SANHA DECLARES RAINBOW CHICKEN PROCESSED PRODUCTS HARAAM

Written by Administrator
Monday, 23 May 2011 07:24 -

THE CARRION CHICKENS HAVE COME HOME TO ROOST

On the 17 May 2011, SANHA, the Assistant Chief Maitah (Carrion) Purveyor, circulated on its website the announcement that it has WITHDRAWN ITS 'HALAAL' CERTIFICATION FROM Rainbow Chicken Plant. SANHA has been compelled by circumstances other than Deeni considerations, to de-halaalize RAINBOW CHICKEN plant. More precisely, SANHA has withdrawn its haraam 'halaal' certification from all RAINBOW CHICKEN PROCESSED PRODUCTS which include chicken polony, chicken viennas, chicken nuggets, chicken strips, chicken schnitzels, chicken crumbed and other value added chicken products.

Since time immemorial relative to the carrion chicken industry jointly conducted by SANHA and its chief, MJC, all of these products and all the chickens brutally killed by way of the killing system described by Rasulullah (sallallahu alayhi wasallam) as Shareetatush Shaitaan (the Devil's

Slaughter), and which haraam system SANHA proclaimed halaal, have been HARAAM MAITAH (CARRION). Thus, while there is nothing new in SANHA's announcement, this belated concession grudgingly released, demonstrates the treacherous conduct of this carrion purveyor, for it has for ages withheld this irrefutable fact from the Muslim public thereby inducing Muslims to consume rotten, diseased, haraam carrion.

Furthermore, in excluding from its proclamation of haraam the carrion chickens and applying it to only the byproducts of the dead, rotten, diseased chickens, SANHA is flagrantly and without the slightest fear for Allah Ta'ala and the disastrous and momentous Accountability (Hisaab) perpetuating the cruel and haraam myth that Rainbow Chickens, i.e. the brutally killed chickens, are 'halaal' whilst the reality is that all the chickens killed at all Rainbow Plants certified by SANHA, and in all other plants certified by the other carrion hawkers are HARAAM CARRION. RAINBOW CHICKEN plant in flagrant violation of the agreement which it has with SANHA to abide by the terms of the contract, has defiantly introduced haraam Brazilian carrion meats for

its byproducts. Despite this insolent defiance of Rainbow Chicken plant, SANHA, due to its inordinate crave for the haraam riba boodle, continues to certify Rainbow's frozen chickens.

This

carrion halaalizer refuses to learn from the defiance of Rainbow Chickens and its scorn and contempt for the 'halaal' contract that kuffaar can never be trusted with matters which are related to

the Shariah, to halaal and haraam issues. The boodle is the determinant which seals the mouth of

SANHA and which compels it to conceal the truth to continue proclaiming the chickens 'halaal'. While SANHA has issued its muted 'urgent announcement' to proclaim RAINBOW CHICKEN byproducts haraam, Muslims who are addicted to consuming haraam carrion, will continue to devour the rotten carrion for two reasons: (1) It is not easy to abandon an addiction. (2) Weeks and

months will lapse without people gaining knowledge of the fact that SANHA has declared Rainbow Chicken products to be haraam.

SANHA DECLARES RAINBOW CHICKEN PROCESSED PRODUCTS HARAAM

It is a logistical impossibility to notify every member of the Muslim community that the carrion which they had previously believed to be 'halaal' is now haraam. Study the following facts:
(a) SANHA had discovered weeks or month ago that Rainbow Chicken plant was marketing the haraam Brazilian chicken polonies, etc. as certified 'halaal' by SANHA. While the wrangling was in process behind the scenes, the carrion products continued to be marketed, sold and purchased by

Muslims.

(b) After a considerable time period of behind the scene secret meetings and wrangling, when Rainbow Chickens defiantly gave SANHA a donkey-kick under its pants, SANHA had no alternative but to issue its rubbish and muffled 'urgent notice' .

(c) The urgent notice was circulated on SANHA's website. How many Muslims who do not have computers are still unaware of this stupid 'urgent notice', and are continuing with their addiction of carrion consumption?

(d) An age has lapsed from the time of the haraam discovery by SANHA, Rainbow's defiance and the publication on the website of SANHA's 'urgent notice'. Despite the urgency of the issue, 99% of the carrion-consuming Muslim public remains unaware of SANHA's haraam status awarded to the carrion products.

(e) Despite the 'urgent notice', this information has not been as yet affixed to the notice boards of

the country's 1000 Musjids. And, even if and when the notice appears on the notice boards, how

long will it take for this information to filter through and reach every carrion-consuming member of the Muslim community? On an average, only between 5 and 10 percent Muslim males perform

Salaat regularly or attend the Musaaqid daily. On Fridays there is a substantial increase. Of the musallis who attend, NEVER does each and every one read the notices the same time.

Numerous

musallis simply walk pass without bothering to look at the notice boards. The apathy is worse on Fridays. The musallis simply rush out of the Musaaqid in droves and with haste. Very few take note of the notices. Those who attend the Musaaqid read the notices at leisure and at their pleasure,

never as an incumbent duty.

(f) Even if a diligent, intensive and extensive process is set into motion for informing the public – but in reality this is NEVER the case – then too it will take ages for the entire Muslim community spread out in the east, west, north and south of the country to simultaneously learn of the haraam

status of the rotten carrion chickens. In fact, even after many months the entire Muslim community

will not learn of the carrion which SANHA itself has proclaimed to be carrion.

(g) Despite the withdrawal of SANHA's certification, Rainbow Chickens, to this day, continues to market these carrion products –declared carrion by SANHA – to be halaal. The business outlets are still selling these haraam chicken byproducts bearing SANHA's halaal logo. There is concrete

evidence for this.

(h) A most insidious attitude which has become ingrained in the carrion-consuming Muslim

public who have been devouring the haraam carrion on SANHA's strength, is to simply buy these

products without looking at the logo. The name Rainbow Chicken has become synonymous with 'halaal'. Hence, they no longer look whether Rainbow Chickens are certified by the SANHA carrion purveyor or by the MJC carrion shaitaan. This attitude will remain. It will not be easy to efface this corrupt attribute from people who are addicted to carrion consumption in the same way

as it is not easy for a drug addict to abandon the accursed addiction.

(i) A disgustingly dishonourable development in the carrion saga is the MJC's attitude. With its mouthwatering for the riba boodle, the MJC perpetually lies in the shadows in ambush I anticipation of a SANHA retreat. It lurks in the folds of the SANHA certified plants hoping for problems which would constrain SANHA to cancel its certification. When this does happen, then before SANHA has even been kicked out by the carrion plant, MJC pounces and issues the plant

with a new haraam 'halaal' certificate. Thus it claims the haraam riba boodle which was formerly SANHA's share of the booty. The MJC had performed this despicable haraam stunt a few months

ago at ANCA chickens. As soon as SANHA withdrew its haraam 'halaal' certificate, the MJC rushed in with devilish haste and issued ANCA a new satanic certificate to advertise the carrion 'halaal'.

With Rainbow Chickens, MJC has repeated its shaitaani performance. The MJC is now certifying the carrion which SANHA had formerly certified. Many Muslims in Natal and Transvaal who will not even soil their saliva spitting on a rubbish certificate of MJC, will now continue to devour Rainbow Chicken products, not because of MJC certification, but because, they

have not as yet been informed, and will simply pick up from the shelf a packet of Rainbow Chicken carrion product labouring under the misconception of it still being under SANHA's certification.

It is absolutely incumbent for Muslims to wake up and understand what exactly they are doing to their Imaan, Akhlaaq and physical bodies by devouring the rotten, diseased, haraam carrion chickens and other meats, whether it be chicken products or halaalized beef or mutton products.

All such halaalized processed meats and chickens are undoubtedly HARAAM. There remains not

a shred of doubt in the irrefutable fact that all these processed meat and chicken products are 100%

HARAAM.

The very first fact which Muslims must accept besides the issue of the chickens being haraam, is

that it has been scientifically proven that processed, artificial, plastic chickens are extremely injurious for the human body. These carrion meats cause CANCER, HEART DISEASE, and a variety of other serious diseases which destroy the health of the carrion-consumer.

The second irrefutable fact which Muslims must accept is that all processed chickens are conclusively HARAAM CARRION. According to the Shariah, Haraam meat may not be fed to

even dogs and animals in general.

The third indisputable fact is that according to the Qur'aan, the one who consumes haraam, follows in the footsteps of shaitaan.

The fourth undeniable fact of the Shariah is that consumption of haraam magnifies bestial carnality. The carnal nafs becomes as bestial as the nafs of a swine. The carnal greed in man multiplies manifold when he ingests haraam.

The fifth Shar'i fact is that the ibaadat of the consumer of haraam food is rejected by Allah Ta'ala. The thawaab of his Salaat, etc., is extinguished, and his duas are rejected.

The sixth fact confirmed by the Auliya is that the spiritual defences and moral fibre of the one who devours haraam are utterly neutralized. It is for this reason that the Qur'aan Hakeem couples

haraam food with submission to shaitaan.

The seventh fact emphasized by Rasulullah (sallallahu alayhi wasallam) is that abstention from even mashkook (doubtful) substances is Waajib (compulsory). Rasulullah (sallallahu alayhi wasallam) explained that indulgence in the doubtful culminates in indulgence in haraam.

Doubtful food gradually desensitizes and destroys the spiritual fibre.

While these evils are connected to even mashkook (doubtful) food, processed chickens and meats are not 'doubtful'. On the contrary it is HARAAM carrion, the harm and injury, both physical and spiritual, of which by far outweigh the poisonous effects of doubtful food.

The steps underlying the final decision to make the announcement of Haraam display conspicuously the treachery which constrains SANHA to conceal the haraam status of the chicken

products. The announcement of haraam is preceded by several steps over a long period of time.

During this very lengthy interval in which the steps unfold, the community is fed HARAAM carrion with the full knowledge of SANHA who desperately tries to resolve the irregularity without its publication. These developments are:

- Processing, packing and selling the haraam products by Rainbow Chickens.
- Discovery of the violation by someone.
- The report made to SANHA that Rainbow has violated its contract agreement.
- SANHA calling a secret caucus meeting to discuss the issue and to plan a strategy to contain, rectify and conceal the violation. At all costs the public must not know.
- SANHA engages with Rainbow's management to rectify the irregularity. Much time lapses to set up a meeting with Rainbow's management.
- The meeting takes place. Rainbow rejects SANHA's desperate pleadings to rectify the irregularity and refuses to terminate the use of haraam Brazilian chickens for preparing the byproducts. A stalemate follows. Rainbow kicks SANHA out from its office and negotiations are finally terminated.
- SANHA conducts several clandestine meetings with its hierarchy to decide ways and means of damage control.
- Force of circumstances ultimately compels SANHA to make the announcement that **RAINBOW CHICKEN PROCESSED PRODUCTS ARE INDEED HARAAM CARRION AS THE MAJLIS HAS PERENNIALY PROCLAIMED.**

Meanwhile while all this lengthy drawn out processing spanning several months is in progress,

SANHA DECLARES RAINBOW CHICKEN PROCESSED PRODUCTS HARAAM

Written by Administrator
Monday, 23 May 2011 07:24 -

millions and millions of the HARAAM Brazilian carrion chicken products are sold all over the country bearing SANHA's 'halaal' logo, and this continues to this very day. It will take ages for the

rot to come to an end. The consumption of the Haraam Brazilian chicken byproducts produced by

Rainbow Chickens will continue for a very long period to come.

Indeed it is a nightmarish scenario when a carrion vendor such as SANHA is forced to cancel its halaam 'halaal' certification. Millions of the halaam products continue to proliferate the market with the carrion vendor's 'halaal' logo, and the community addicted to consuming the rotten, diseased carrion meats continues to devour it for a considerable time period into the distant future.

May Allah Ta'ala destroy these halaam, illegitimate carrion halaalizers who ruin the Imaan and morality of the community with their halaalization of carrion.

ALL PROCESSED CHICKENS – RAINBOW, EARLYBIRD, GOLDI, AND OF EVERY OTHER BRAND PROCESSED BY NON-MUSLIM PLANTS – ARE HARAAM. IT IS NOT PERMISSIBLE FOR MUSLIMS TO BUY OR SELL THE CARRION MEATS WHICH CAUSE CANCER AND A VARIETY OF SERIOUS DISEASES, AND WHICH THE SHARIAH SAYS IS UNFIT FOR EVEN DOGS.

"O People! Eat from the earth that which is Halaal and Tayyib (Wholesome), and do not follow in the footsteps of shaitaan. Verily, He is your open enemy. Most assuredly he orders you with evil and immorality and that you fabricate about Allah what you know not."

(Qur'aan)
