

THE PRO-ACTIVE KUFR OF A U.K. MORON 'SCHOLAR'

In a stupid attempt to denigrate the Fuqaha of the Salafus Saaliheen age, and to cunningly scuttle the explicit command of Rasulullah (Sallallahu alayhi wasallam) pertaining to plagues and epidemics, a jaahil U.K. agent of Iblees claims that the massive amounts of deaths in the epidemics which had ravaged Muslims during the past centuries was the consequence of the 'reactive' attitude of the Fuqaha and Auliya of the Salafus Saaliheen age.

This moron avers that the 'proactive' attitude of the medical experts and governments of today is containing and eliminating the virus causing the plague. This averment is the conclusion of only an atheist or a munaafiq parading himself as a Muslim. His claim of 'proactivity' in the context of the epidemic and in the light of the categorical and explicit Ahaadith of Rasulullah (Sallallahu alayhi wasallam) is explicit proactive KUFR. It is not implied kufr. It is clear-cut and blatant kufr which expels a Muslim from the fold of Islam.

This haraam, satanic 'proactive' stupid theory is in diametric contradiction of the explicit statement of Rasulullah (Sallallahu alayhi wasallam), viz. *"The plague is Athaab and Shahaadat."* All those who deny this authentic Hadith or interpret it into submission of the kufr theory propounded by the atheists, are murtaddeen and munaafiqeen.

When Allah Azza Wa Jal dispatches a Punishment, who can ever thwart or even impede it? Who can prevent the progress of the Athaab sent by Allah Azza Wa Jal? Who can save any person whom Allah Azza Wa Jala has decreed to perish by the Athaab? But the moron 'scholar' with his stupid 'proactive' bootlicking supposition believes and propagates that despite Allah Ta'alah having willed certain beings/communities to be punished, the 'proactive' methods of the atheists can save these people from His Athaab. This man's brains have been convoluted with kufr which shaitaan has urinated into his brains.

Nothing can or will ever be able to impede the progress of Allah's Athaab. It will take its course and complete its mission after having executed its task *par excellence*.

PRO-ACTIVE KUFR OF A U.K. 'SCHOLAR'
