ZINA AND THE PLAGUE

Among the causes of a plague is the prevalence of zina. When this filth becomes widespread, it becomes a cause for a plague. In this era both Muslims and non-Muslims indulge in fornication and adultery flagrantly and blatantly. In fact, zina and deeds of satanic perversion have acquired acceptance and even respect.

Rasulullah (Sallallahu alayhi wasallam) said:

“When faahishah (zina, homosexuality and immorality of all kinds) become rampant, then plagues and such diseases will afflict the people, of which their forefathers had not heard.”

The planet earth is rotten with fornication, adultery, homosexuality, lesbianism and other satanic varieties of sexual perversion. Almost every Muslim indulges in cellphone zina. Indulgence in cellphone pornography is filth in which even ‘scholars’, molvis and sheikhs indulge.

Those who indulge in these cesspools of filth and moral inequity appear to be atheists. It is not possible for a true Mu’min to become addicted to such rot and filth. While a sin can be committed in a moment of ignorance and nafsaniyat, a Mu’min does not become an addict of immorality nor does he pre-plan sin.

Remember that Rasulullah (Sallallahu alayhi wasallam) said that when a person indulges in zina, his Imaan exits from his body and remains suspended. Should any one of the fornicators perish in the act, he dies without Imaan. This applies to even cellphone zina.

In terms of the Aakhirat, zina of the eyes, zina of the ears, zina of the tongue, zina of the mind and heart are also actual zina, i.e. the actual act of adultery. The punishment in the Aakhirat will be the same.

It is not surprising if the current epidemic is the consequence of the planet submerged in the filth of fornication, adultery, sexual perversion and the like.
