BIOGEOMETRY SHIRK – ANCIENT SHIRK – OLD WINE IN A NEW BOTTLE

It is the shirk of the ancient Egyptians, of the Hindus and of the Buddhists. All SHIRK is a single breed of KUFR. The scientific definition of shirk does not change the kufr status of shirk. The shaitaan's bait to entrap Muslims into this snare of SHIRK is the chimera of Asmaaul Husna.

Biogeometry is also referred to as 'sacred geometry'. Its origin is in idolatry, especially the type of idolatry of Fir'oun and the ancient Egyptian mushrikeen. The ancient concept of this brand of idolatry and shirk as defined by the Satanists themselves is:

"Sacred geometry refers to universal patterns used in the design of sacred architecture and sacred art. Its roots are in ancient temple sciences and esoteric practices…"

Ancient temple sciences and esoteric practices are SHIRK and are inextricably associated with idol-worship.

The Satanists further that *"Biogeometry is the design language of energy and shape."*

Shapes and forms emit energy in terms of this concept of shirk. These emissions exercise both beneficial and harmful influences. This is precisely what the mushrikeen of all ages believe in. Ancient Egyptians, Hindus, Buddhists and all breeds of idolaters believe that their stone idols have powers by which they exercise beneficial and harmful influences on people. Idols have form and shape.

The Satanists say that biogeometry is *"the patented science of using the energy principles of shape".* The ancient idols, viz., *Wadd, Suwaagh, Yagooth, Ya-ooq, Nasr,* etc. which were worshipped during the era of Nabi Nooh (Alayhis salaam) and prior to his age, were objects of form and shape which the mushrikeen believed had the power of granting benefit or inflicting harm. That is why they prayed to the idols. This is precisely what these Biogeometry Satanists believe. Thus they say:

"Pyramids and hemispheres are energy emitters that focus a penetrating carrier wave called Negative Green which gives these shapes strong communication properties that facilitate prayer and spiritual communion……
Vertical Negative Green has a preserving influence as employed for mummification in the pyramids of Ancient Egypt. Prolonged exposure to this vertical aspect is detrimental to living systems."

In simple terms: These shapes and forms – the pyramids, idols and the like – have the power to benefit and to harm. Thus, stone constructions such as the pyramids and stone idols have the power of emitting beneficial and harmful influences according to the biogeometry ideology of modern-day mushriks masquerading as scientists and even as Muslims. They have presented ancient shirk in a new bottle painted with scientific hues. But the contents are the same old shirk which is vehemently condemned in the Qur'aan Majeed and Ahaadith.

The ancient mushrikeen believed in such powers of their false deities. Referring to this false and baseless belief of the mushrikeen, the Qur'aan Majeed records the statement of the mushrikeen against Nabi Hood (Alayhis salaam). Refuting the Nabi's call of Tauheed, the mushrikeen said:

"We only say to you that some of our gods have afflicted you with a malady."

This belief of the Mushrikeen comes within the scope of the *Negative Green Wave"* theory propounded by the biogeometry mushrikeen of our age. Refuting this stupid negative green wave for which is asserted the power of benefit and harm, the Qur'aan Majeed states:

"Say: 'Do you worship besides Allah that (idols) which cannot harm nor benefit you?" *(Al-Maaidah, Aayat 76)*

What! Do you take as friends besides Allah, that which cannot benefit nor harm you?" *(Ar-Ra'd, Aayat 16)*

What! Can they not see (understand) that it (the calf idol) cannot reply to them nor does it have the ability to harm them nor benefit them? *(Taa Haa, Aayat 89)*

They took (worshipped) deities (idols) besides Allah whilst they (the idols) cannot create anything, but they are made (by the hands of people), nor do they have the ability to harm or benefit themselves, not do they have the power over death and life nor over resurrection." *(Al-Furqaan, Aayat 3)*

There are many more Qur'aanic Aayaat which categorically refute power of any kind for these shapes and form, i.e. idols which the mushrikeen of all ages worshipped and even today worship with the corrupt belief of these idols being able to benefit and harm just as the stupid, satanic biogeometry Satanists are propounding. **Muslims should not allow themselves to be beguiled and trapped in the shirk of these biogeometry mushrikeen who are offering ancient shirk and kufr in a new bottle painted with 'scientific' colours.**
